- Have been treated with an SSRI or other antidepressant
- Are aged 18 – 65 and don't regularly exercise
- Seen in the emergency department in the past three years

Leaf AI's response

I couldn't identify patients who "don't regularly exercise", so you may need to refine your search, however:

53 patients were found:

- 1) 1,046 had a body mass index (BMI) between 35 and 40 (in the past 6 months)
- 2) 442 were treated with a Selective Serotonin Re-uptake Inhibitor (SSRI) or other antidepressant (anytime)
- 3) 421 are age between 18 and 65
- 4) 53 visited the Emergency Department (in the past 3 years)
